DETAILED ACTION

Response to Amendment

1. Claims 1-3, 5-13, 22, 26-33, and 35-37 are pending in the present application.
2. Applicant's arguments filed June 4, 2003 have been fully considered but they are not persuasive. As addressed below, Co-pending Application No. 09/098,041 discloses the claimed limitations.

Co-pending Application No. 09/098,041 discloses the image values stored in the frame buffer (page 2 of amendment filed on 7/12/00). In other words, Co-pending Application No. 09/098,041 discloses a display screen coupled to the frame buffer for displaying image. Thus, the display is displaying image according to the image values.

In addition, Co-pending Application No. 09/098,041 discloses rasterizing the data in a floating point format (pages 6-7 of amendment filed on 7/12/00). In other words, Co-pending Application No. 09/098,041 discloses a rasterization circuit in that a rasterization process operates on a floating point format. Thus, the claimed limitation rasterizing the data in a floating point format corresponds to a rasterization process which operates on a floating point format.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims **1-3, 5-13, 22, 26-33, and 35-37** are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of renumbered claims 1-4, 7, 11, 13, 17-24, 27, and 29-31 of copending Application No. 09/098,041. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

The subject matter claimed in the instant application is fully disclosed in the copending Application No. 09/098,041 and is covered by the copending Application No. 09/098,041 since the copending Application No. 09/098,041 and the application are claiming common subject matter, as follows:

Claims 1 and 2 of the application recite the scope of invention of claim 1 in the copending Application No. 09/098,041.

B.) Re claim **3**, claim 2 of copending Application No. 09/098,041 claims all the limitations of claim 3 of the present application (page 3 of amendment filed on 7/12/00 of copending Application No. 09/098,041).
